Programming Career

PHP

 I have developed a full fledged website using PHP and Javascript from scratch.
 I had a basic understanding of SQL and I have accomplished that by self taught.
 Project: https://github.com/needyamin/smartlink

Javascript

 I have developed some javascript calculators and other tools for my friends. And it is solving real life challenges. I have accomplished javascript by self studying from textbooks and online courses.
 Link: https://github.com/needyamin/javascript-tools-calculator

Python

 Python is my base and favorite programming language. I learned it by doing some popular online courses on edX and Coursera. I did some project using python. Below I have given a project link.
 Link: https://github.com/needyamin/blood-donation-system

SQL

 I have learned SQL from online courses. It helps me with data science, data analysis and scripting projects. Below I have given a project link which project I did using php and sql

Hobbies

★ *Listening To Music*

Music is the language of the spirit. It opens the secret of life bringing peace, abolishing strife.

★ *Coding*

Sometimes it's better to leave something alone, to pause, and that's very true of programming. Quotes by Joyce Wheeler. I believe in coding because of new challenges.

★ *Play Guitars*

I like to be quiet and play guitar and just chill. When I have downtime, music is a big part of my life. Not so much singing, but I play the guitar.

★ *Modern Dance*

No valid plans for the future can be made by those who have no capacity for living now. Dancing is just discovery, discovery, discovery - what it all means, the way the little bone near the ankle relates itself to the floor for a perfect stance, a perfect plie.
